American Nurse Today provides our partners unique opportunities to connect with our audience beyond the journal pages. As part of our Digital Resource series, we offer several options for strategic online assets. These offerings consist of audience-specific content available for download, and accessible in browsers and devices (such as tablets, smartphones and e-readers). These digital assets are convenient and tech-focused, making them effective tools for building brand awareness and promoting thought leadership.

Our Digital Resources can position your organization as an authority on a topic, as well as present a product or service as a viable industry solution.

All Digital Resources are available on our journal website, and include our Digital Push Campaign — online activities that collectively build awareness and engagement throughout our readership. These initiatives include:

- **NurseLine:** e-mail marketing through our e-newsletter banner ads
- **Customized e-blasts:** Dedicated e-communications with branding and content
- **Info Hub:** Ongoing engagement through inclusion in our content e-bulletin
- **Social Media:** Recurring campaigns, including posts on official accounts for Facebook, Twitter and LinkedIn.
- **Dedicated Landing Page:** All promotions will direct audiences to a sole URL that is branded to a partner’s business, product or campaign. The customized URL can include terms specific to a program or identity, and can be incorporated into a partners own marketing and communications initiatives.

These high-impact programs develop interest and engagement from our audience, and can provide lead nurturing opportunities for our partners. Healthcom Media (HCM) can contribute to the design, content development and production, or can assist in the repurposing of published assets from our partners.

**eBooks**
An eBook is a publication featuring copy and images and consists of academic, marketing or sales related content. eBooks can be designed with an organization’s brand standards, or as an unbiased editorial or research formatted document.

**White Papers**
A White Paper, also referred to as a Case Study, is an authoritative report or guide that informs readers about complex topics or relevant industry issues. White Papers present the authoring organization’s philosophy on the matter, and are meant to help readers understand an issue, solve a problem, or make a decision. In business, a White Paper is the perfect asset to persuade an audience and promote a product or viewpoint. White Papers differ from eBooks in that they tend to be less visual and more academic in their presentation.

**Infographics**
An Infographic, also referred to as Information Graphics, is a visual representation of data or knowledge intended to clearly present information at a glance. Developed specifically for Health Care Professionals, Infographics can be the best format to illustrate statistics, patterns, trends and comparisons. Patient Handouts aim to enable patients to improve their own health by changing their health-related behaviors. These sponsored assets serve as a brand-building and awareness opportunity for supporting organizations.

**Podcasts**
A Podcast, also referred to as a “Netcast” (as a product neutral term), is a digital audio file that is available for listening, downloading and storage on various devices. Podcasts are often presented in topic-oriented episodes, and produced as a series that can be syndicated to a user's desktop, mobile application, or portable media player.

**Live Webinars**

Live Webinars consist of real-time multicast from a presenter, or panel of presenters, to a geographically diverse audience. Live Webinars are scheduled and marketed a minimum of 6 weeks in advance, and feature online registrations and reminder e-mails. The Live Webinar format offers text-based messages for submitting questions to speakers at any point during the presentation. Applications for web conferencing include topic discussions, training events, lectures, or sales related presentations.

**OnDemand Webinars**
An OnDemand Webinar is a scaled down version of the Live Webinars, in that they are entirely pre-recorded and accessible from our website at any time. The OnDemand Webinars take on all the appearances and benefits of the Live version, but do not occur in real time on a scheduled date. Question and answer session do not occur, but can be simulated as part of the recorded presentation.

**Special Reports**
A Special Report, also referred to as an Editorial Supplement, are sponsored, fully independent publications that are published for distribution with one of our journals, but also can serve as stand a alone thought leadership piece.
